

VALUE PROPOSITION

(electricity distribution version) #1

FOR
electricity distribution network owners

WHO

care about the environment and wishes to avoid use of carcinogenic impregnation while safeguarding investment costs and utility workers working conditions

WOPAS

is the new alternative, which after carefully listening to utility workers and network owners, offers a technically enhanced electricity distribution pole

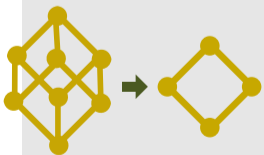

THAT

Is creosote free, made of natural wood encapsulated with drinking water pipe plastic material

Requires no special treatment plant for future recycling (sorted and/or used as fuel)

Offers mechanical properties that are unprecedented and 60-80 years durability

Has a simplified product program which still covers all needs in the 8-16 m pole segment

Is fully compatible with current climbing irons and accessory programs

Unlike traditional electricity distribution poles, WOPAS makes less environmental footprint and improves utility workers working conditions.
